The p' -subgraph of the Young graph and the restriction of characters to Sylow p -subgroups

In the first part of this talk I will present some new results on the restriction of characters of p' -degree of the symmetric group S_n to S_{n-1} .

In the second part I will focus on the description of the restriction of irreducible characters of finite groups to Sylow p -subgroups.

The talk is based on joint works with Stacey Law, Stuart Martin and Gabriel Navarro.
