“Irreducible restrictions of representations of symmetric groups”

Irreducible restrictions of representations of symmetric groups to arbitrary subgroups have been classified by Saxl in characteristic 0 and by Brundan and Kleshchev in characteristic at least 5. In characteristic 2 and 3 however only partial results were known.

In this talk I will show how a classification can be obtained in characteristic 2 or 3. This is joint work with Alexander Kleshchev and Pham Huu Tiep.

Donnerstag, 12.07.2018
ab 14:15 Uhr, a410

Hauptgebäude der Leibniz Universität Hannover

Alle Interessierten sind herzlich eingeladen.
