

# Oberseminar zur Algebra und Algebraischen Kombinatorik

**Dr. Pierre-Guy Plamondon**

(Université de Paris Sud XI)

## „Generic projective presentations“

We will be interested in this talk in projective presentations of finitely presented modules over associative algebras. The aim will be to present some properties of modules admitting "generic" projective presentations (in a sense to be defined), such as possible direct sum decompositions and homological properties.

This work was motivated by the categorification of cluster algebras; however, the talk will be purely module-theoretic.

**Montag, 01.02.2016**

**ab 14:15 Uhr, Raum a410**

Hauptgebäude der Leibniz Universität Hannover

Alle Interessierten sind herzlich eingeladen.
